

Aligned with our Trust's vision, **Excellence, Exploration, and Encouragement** powered by **Equity**, we are committed to overcoming social inequality, passionately striving to improve the life chances of every child in our care. Together, we embark on a journey of academic achievement and personal growth, ensuring that all students are supported and empowered to reach their full potential.

DT Vision Statement

In an increasingly technological world, we encourage our children to design and make products that solve real and relevant problems within a variety of contexts. DT is an inspiring, rigorous and practical subject which promotes the use of creativity and imagination for all (**equity**). Through DT our children acquire a broad range of subject knowledge and draw on a range of disciplines, such as mathematics, science, engineering, computing and art. All children are supported in their **exploration** of a range of DT projects so that they are able to approach this curriculum area with confidence, enthusiasm and the appropriate level of skill. We aim to develop critical understanding and the ability to question and evaluate the success of a product, considering its impact on daily life and the wider world.
