

Aligned with our Trust's vision, **Excellence, Exploration, and Encouragement** powered by **Equity**, we are committed to overcoming social inequality, passionately striving to improve the life chances of every child in our care. Together, we embark on a journey of academic achievement and personal growth, ensuring that all students are supported and empowered to reach their full potential.

Science Vision Statement

As scientists, children develop a curiosity in learning about the world around them. At Holy Trinity we aim to nurture this through the teaching of science with a focus on scientific knowledge and enquiry skills. We aim to progress these two aspects of the subject through **exploration**, enquiry based, practical curriculum that aims to satisfy our children's inquisitiveness. Science is all around us, so we use the school's outdoor learning areas and Forest School to support the teaching of this subject.

The aims of our science teaching are to enable all children to engage fully and develop an **excellent** understanding of what it means to become a chemist, physicist and biologist.

We support all children (**equity**) to understand the world around them and the impact they can have on it, engaging with the wider community and our RAF neighbours with STEM enrichment activities to broaden their horizons, where children can show enthusiasm towards a science profession engaging confidently in their chosen subject.
