

Aligned with our Trust's vision, **Excellence, Exploration, and Encouragement** powered by **Equity**, we are committed to overcoming social inequality, passionately striving to improve the life chances of every child in our care. Together, we embark on a journey of academic achievement and personal growth, ensuring that all students are supported and empowered to reach their full potential.

Geography Vision Statement

As Geographers our children will learn to value the world around them as well as their more immediate locality through questioning, **exploration**, understanding and appreciation. They will deepen their knowledge of people, places, human and physical geographical features through a clear progression of knowledge and skills. This will help them aspire to protect the environment around them and in the wider world. We aim to provide children with enquiry led learning opportunities, fieldwork, map work and experiences, which help them to grow and develop as individuals and as members of our wider community. Our Geography curriculum encourages children to value and be curious and fascinated about the world and its people. Our curriculum allows the children to **explore** the globe visiting each of the continents through carefully planned units of work. It aims to equip children with **excellent** knowledge and understanding of the world, people, places and environment and develop respect and appreciation for all cultures. This ensures **equity** for all and enables children to extend their knowledge beyond the United Kingdom. This includes the characteristics of a range of the world's most significant human and physical features. It will help all pupils especially disadvantaged and pupils with SEND to make progress in terms of geographical knowledge and skills during their time in our school.
